

JLG Forklift Parts

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora set out on a cross country journey in their RV. Freshly retired, after spending numerous years working with his brother to assemble their crane business into an industry leader, John had no idea that important trip would permit JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling technologies was the end consequence of a road trip.

Whilst on their trip, John spent time talking to previous business acquaintances whom the Groves stopped to see along the way. These conversations combined with a tragic event-two workers being electrocuted on scaffolding when the Groves were going to the Hoover Dam- John uncovered a considerable market for a product that could swiftly and safely lift individuals in the air to accomplish maintenance and other construction functions.

Upon returning from their travels, John formed a joint venture with two friends and purchased a metal fabricating company in McConnellsburg, Pennsylvania. In 1970, starting operations with a crew of twenty workers, they designed and sold the first JLG aerial work platform. The company incorporates many of the simple design essentials of that original lift into existing designs.

Since then, JLG Forklifts have come a long way from when Mr. John L. Grove returned from his fatefull cross-country journey and since the first JLG aerial platform entered the marketplace. As of today, the business has expanded itself into many different global marketplaces and continues to develop modern equipment to guarantee that consumers are able to become safer and more efficient within their workplace.
