

Barrel Clamps

Barrel Clamps - Referred to as "Barrel Clamp", this particular hydraulic accessory is utilized on forklifts to clutch items that you want to transport using the forklift. Normally, they are utilized in order to barrels, handle kegs, and paper rolls, together with some barrel clamp designs having the ability to revolve the load. Like for instance, the revolving function permits the person operating the forklift to put in a vertically stored paper into the horizontal intake of a printing press.
